

HEPATITIS: KNOW THE FACTS

Know the main routes of transmission of hepatitis

		HEPATITIS B	HEPATITIS C
1 UNPROTECTED SEX		<input checked="" type="checkbox"/>	<input type="checkbox"/> ?*
2 BLOOD TRANSFUSIONS		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
3 SHARING NEEDLES		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
4 MOTHER TO CHILD		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
5 USING THE TOILET		<input type="checkbox"/>	<input type="checkbox"/>
6 SHARING UTENSILS		<input type="checkbox"/>	<input type="checkbox"/>
7 SHARING TOOTHBRUSHES & RAZORS		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

What you can do

		HEPATITIS B	HEPATITIS C
1 SEE A DOCTOR		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
2 GET VACCINATED		<input checked="" type="checkbox"/>	<input type="checkbox"/>

* The risk of transmission of hepatitis C during unprotected sex is considered very low, especially if you are in a long-term, stable relationship. This risk may be higher among men who have sex with men or if blood is involved.

This is hepatitis... Know it. Confront it.
